**Carroll County
Drug Treatment
Facility**

at

Sykesville,
Maryland

Project Type:

Drug treatment facility for short term residents.

Square Footage:

15,132 s.f.

Project Description:

Architecturally, the client required a new single-story facility to compliment existing campus architectural style and scale.

Functionally, the facility was to be comprised of two male and one female living quarters with separate sleeping quarters, bathing facilities, laundry facilities and lounge areas to accommodate 49 residents. In addition, the residents' quarters shared a centralized dining and kitchen facilities with easy access for staff counseling/monitoring purposes.

Special Design Considerations:

Challenges presented in this project were centered around privacy for both staff and facility residents to maximize therapy treatment/group time.
